

20. What are the additional reports made to ATC without special request when not in radar contact:
  - a. When leaving the FAF inbound (non-precision), when leaving the outer marker or fix inbound (precision)
  - b. Corrected estimate any time it becomes apparent an estimate as previously submitted is in error in excess of 3 minutes
  - c. When encountering weather conditions which have not been forecast, or hazardous conditions which have been forecast
  - d. Answer: All Of The Above
21. FSS Freq:
  - a. 255.4
22. Can OFFICIAL BUSINESS ONLY airfield still be used as an alternate
  - a. YES
23. What are the fuel reserve requirements for Jet Log/DD-175
  - a. The greater of 10% of planned requirements or 20 min at <sup>WAT</sup> endurance at 10,000' (they try to trick you with 20%.....or 10 min)
24. Be able to calculate arc to radial lead points and vice versa:
  - a. Arc to radial (60/arc nm X 1%GS)
  - b. Radial to arc (1% GS)
25. For the Maxwell alternate question look at all the approaches for lowest non-precision mins (I think the glideslope is NOTAM'd out on this question)
  - a. 700-1 1/2 (400 1/2 + 300-1) *you HAVE TO LOOK AT LOW CHARTS*
26. For the test
  - a. Ensure you read the questions carefully paying particular attention to any NOTAMs or other information that will change the approach minimums
  - b. Remember that ASR minimums are found at the front of the approach plates (There may have been a question where you had to look one up)
  - c. On the JET LOG: ensure you fill in all the spaces (including emergency fields [1 for every 3<sup>rd</sup> of your route])
  - d. Tab these airfields (you will be looking at one or more approaches at each)
    - i. Meridian NAS (be carefull not to get confused with meridian/key field)
    - ii. Maxwell AFB
    - iii. Jacksonville NAS, FL

27. Holding at Piquay - adjust holding to commence approach at (1610?) you know holding alt + speeds

AT 310

NAVY 230

TACAN ✓ ± 4%

MSA - 1,000 man made + terrain

ESA - 1,000 man made, 2,000 terrain

When up + over glide path. What IS FAF.

Direct lat routes can't be greater than 260 (130) <sup>each</sup>
